

TAROONN KOYILADA

Profile

Aspiring computer science engineer with a strong foundation in software development, artificial intelligence, and full-stack web applications. Demonstrated experience in building end-to-end solutions using modern technologies. Passionate about using technology to solve real-world problems. Seeking a Software Developer Internship to contribute to innovative projects and further develop my skills in a collaborative environment.

Employment History

Internship at Intrainz

Nov 2024---- Dec 2024

Project: K-Means Clustering and Spam Email Analysis Utilized K-Means clustering to analyze and segment datasets, identifying meaningful patterns and insights. Developed an advanced spam email detection system by processing news and email data, employing clustering techniques for classification. Gained proficiency in data preprocessing, feature extraction, and performance evaluation of clustering algorithms.
